5th April 2018

Order Execution Quality Report – 2017

In accordance with MiFID II – RTS 28 reporting, which came into effect on 3rd January 2018, we are required to make public on an annual basis the Company's top five execution venues in terms of trading volumes for the preceding year. This information has been disclosed for each class of financial instrument, as is detailed below.

The following text represents the additional requirement to provide you with information on the quality of the execution obtained over this same period of time.

As a client you rely on us to protect your interests when completing a transaction in accordance with your instructions and in relation to the factors detailed below. This is encapsulated within our Order Execution Policy which is available from the Hogg Capital and Tier1FX websites.

When placing and/or executing client orders we prioritise the following factors:

- a) Price: for most liquid financial instruments market price will be the overriding factor in attaining best execution.
- b) Cost: execution venues may carry additional charges (such as exchange fees – example: overseas brokerage costs, or settlement/custody costs) impacting the total consideration for a client transaction and therefore representing the most important factor in attaining best execution.
- c) Speed: speed of execution can be important for some types of order or client; it will be a high priority for a Retail Client placing/executing an order in liquid (frequently traded) securities in a fast-moving market.
- d) Liquidity: the ability to execute an order due to illiquid market conditions or the relative size of the order itself may take precedence over other execution factors.
- e) Order size: among other factors this will include minimum fill transactions where a clients' order will fall short of the required transaction size. The opposite may similarly apply. In both cases, execution of a transaction will very likely override the previously detailed price, cost and speed factors.
- f) Other considerations: we will take into account other execution factors which we believe may warrant consideration in terms of how a client order should be executed.

We will only transact your orders on a regulated market and/or place your orders with a licenced financial intermediary within a strongly regulated jurisdiction. The dealing decisions we make will be with the sole purpose of realising the transaction as quickly and as efficiently as possible and at the lowest total consideration to the client, irrespective of whether said client is classified a Retail Investor or a Professional Investor.

We are a licensed agency broker and in the main we do not act as a counterparty to any of our clients' orders. Where we do on occasion act as riskless principal to a transaction it is done solely for the purposes of facilitating its completion and is executed at a price prevailing at the time this occurs.

The Company does not presently have any close links, conflicts of interest or common ownership with any execution venues, and it does not receive any payments or non-monetary benefits for directing trades to a specific venue.

The financial strength and performance of our Execution Venues are monitored on an ongoing basis.

Hogg Capital Investments Limited is today a predominantly non-advisory investment brokerage that principally comprises various online dealing platforms via its Tier1FX division. These platforms principally trade contracts for differences. The Company nevertheless still retains a significant traditional advisory and dealing presence in direct securities, both locally and overseas, and is a member of the Malta Stock Exchange. The Company therefore comprises distinct business streams employing different procedures when meeting its best execution responsibilities. These procedures nevertheless have and will continue to adhere to the Company's order execution policy, as summarised above, and as detailed in the accompanying data tables.

The data we have provided represents the investment business we have executed and/or received and placed for our clients. The information provided has been compiled on a best endeavours' basis and contains various assumptions in determining whether said business represented passive or aggressive orders. The Company can categorically confirm that it did not receive any directed orders and it can confirm that the accompanying tables are a true general representation of its flow of business activity and the manner of execution.
