

## **Sustainable Finance Disclosure Regulation (SFDR)**

As at the date hereof the Company confirms that it does not take into consideration sustainability risks in the provision of investment advice. Furthermore, due to the size of the investment advisory business of the Company and the nature of the products it recommends it does not assess the principal adverse impacts of investment decisions on sustainability factors.

The Company is however committed to reviewing its position on this aspect and will be considering its internal policies for the purpose of integrating sustainability risks in its investment advisory business which will enable it to assess any potential adverse impact on the instruments recommended to clients.

The Company will also review its position on the consideration of any adverse impact on sustainability factors in the provision of its investment advisory activity and whether considering its size and nature of financial products recommended to clients it would be practical and relevant for the Company to implement such process.
